I am making an app in flutter, where there is a list with comments which should appear on button click(or simply when user open the page for that particular comment). The contents of the list view will be fetched from a json, and the comments text that will be displayed should be fetched depending on which button is clicked. e.g if button_1 clicked, the text should display content1 in the list. If button_2 clicked, the text should display content2 in the list etc. I am unable to figure out how to achieve this. Do you have any ideas or how should i go about achieving this? Here is the image of the expected output, which i want to achieve. A: You can use a SingleChildScrollView to achieve this. For example: @override Widget build(BuildContext context) { return Scaffold(body: SingleChildScrollView(child: ListView.builder(padding: const EdgeInsets.all(8), 6d1f23a050
